CarDealz

User Manual

Install

Method 1: Via Desktop

Download the Dealz Andriod sdk to your computer from the following git repository; https://github.com/Oregand/4THYEARPROJECT

Once you have downloaded the file, take the following steps;

1) Connect your android device to your computer via USB

2) Transfer the sdk file from your computer's file system to the android's file system.

3) Disconnect your android device from the computer.

Setup & Requirements

Ensure you have at least an Android API of 4.2.1 running on your device.

Ensure you are connected to a Wifi connection or have a 3/4G connection.

Open the "Dealz" application by pressing the application Icon on screen.

CARDEALZ

Simple, yet eligant prediction

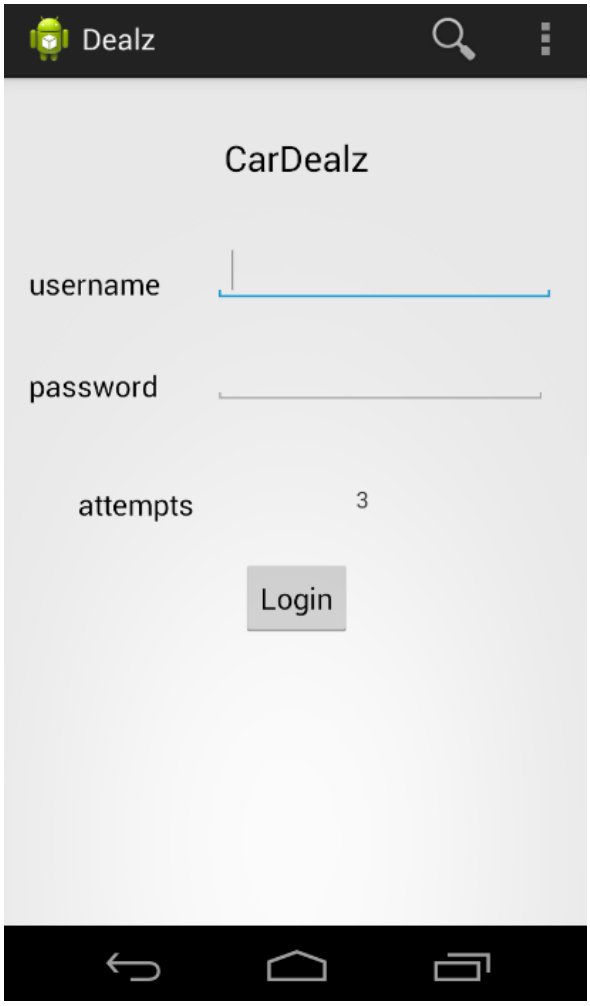
Guide

Login

When you begin the application, you will be greater with a log in screen.

In a later build we will account for user registration but for the Beta, simply use the username & password: admin

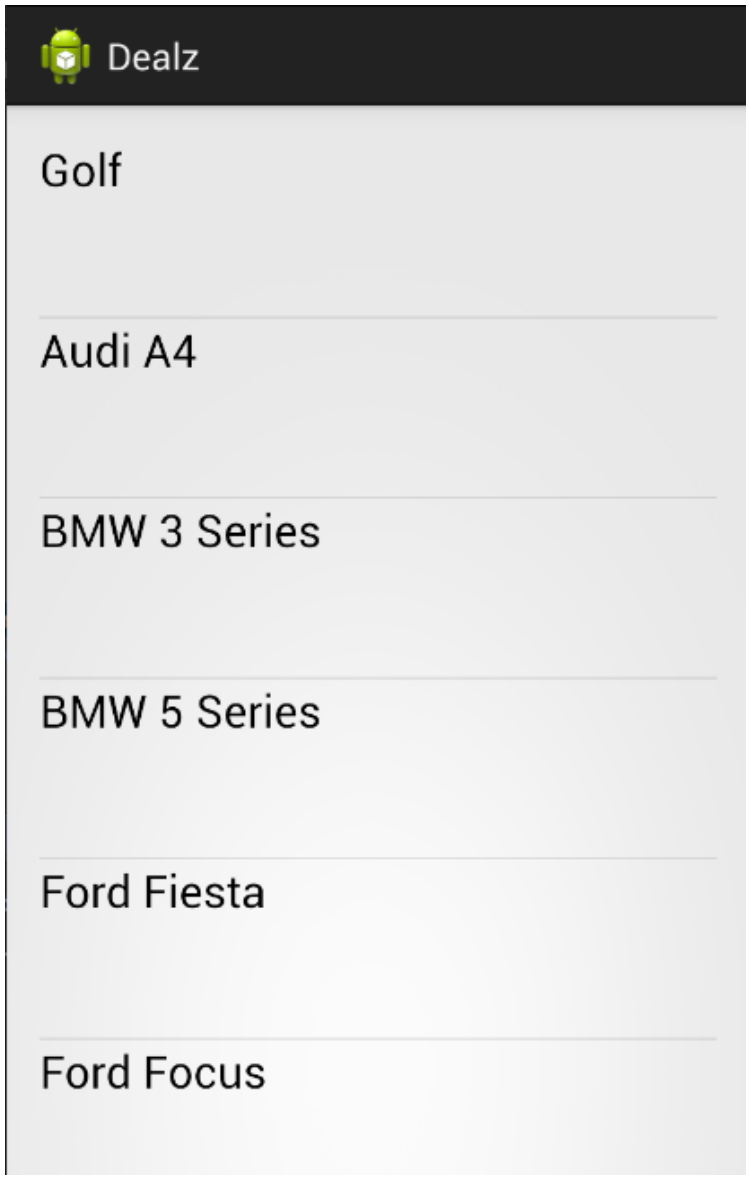
You will be permitted three login attempts before the system will deactivate.



Brand's

When the application opens, you will first be greeted by a list of car brands i.e. Vokswalgen Golf, BMW 3, 5 etc.

To begin, select the type of car you wish to see by pressing the name of the car on screen

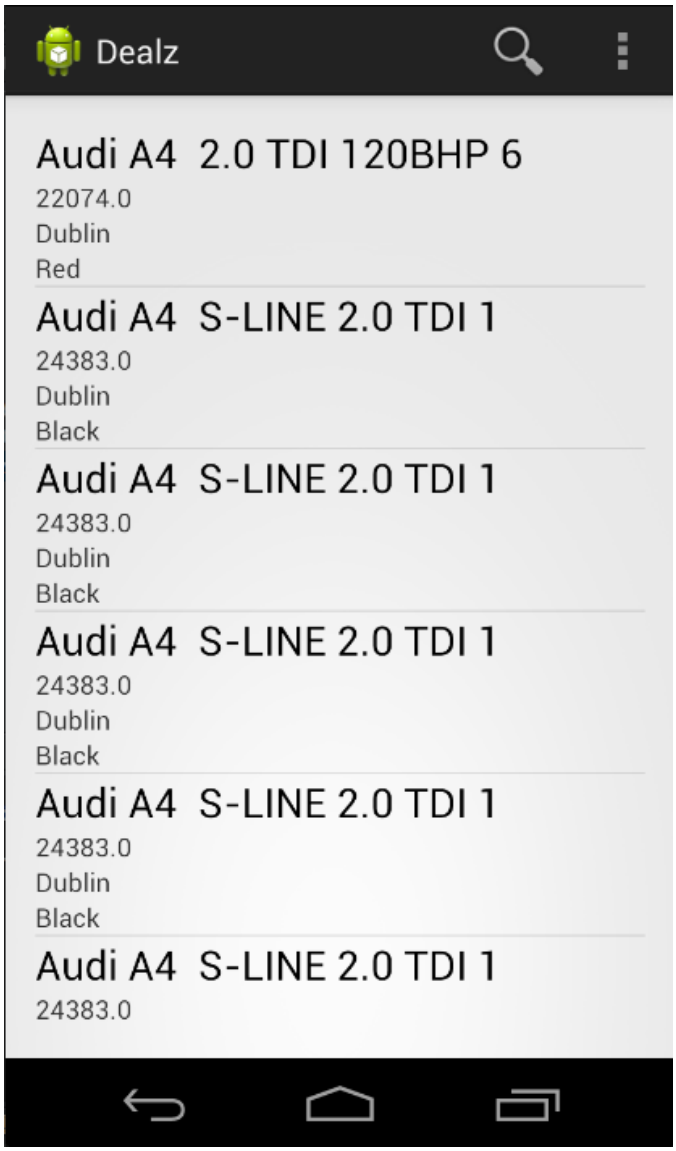


Actual Car Listing's

You will now be taken to another list, containing multiple listings of that car type.

Each car in this section is considered a "good deal" and worth reviewing.

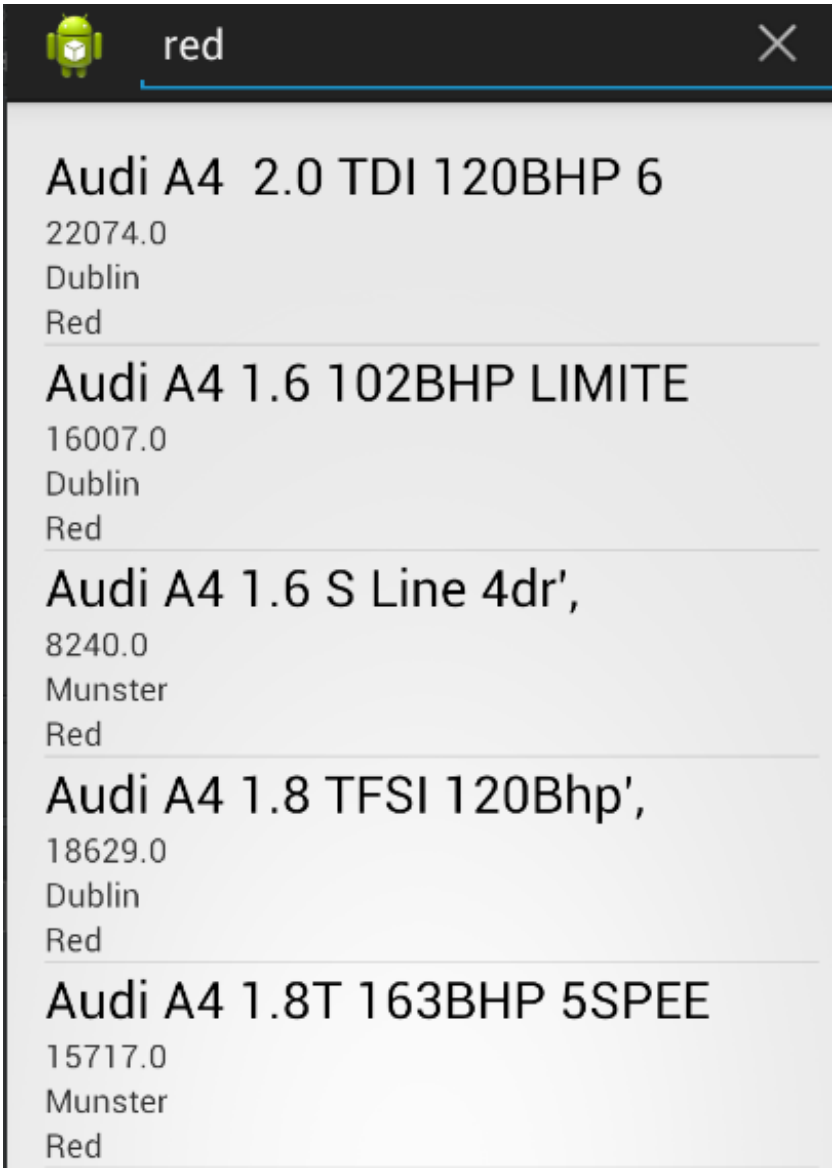
When you identify a car from the list that you feel is a good choice for review, please click the on the car and you will be taken to the individual car for more information.



Search Bar

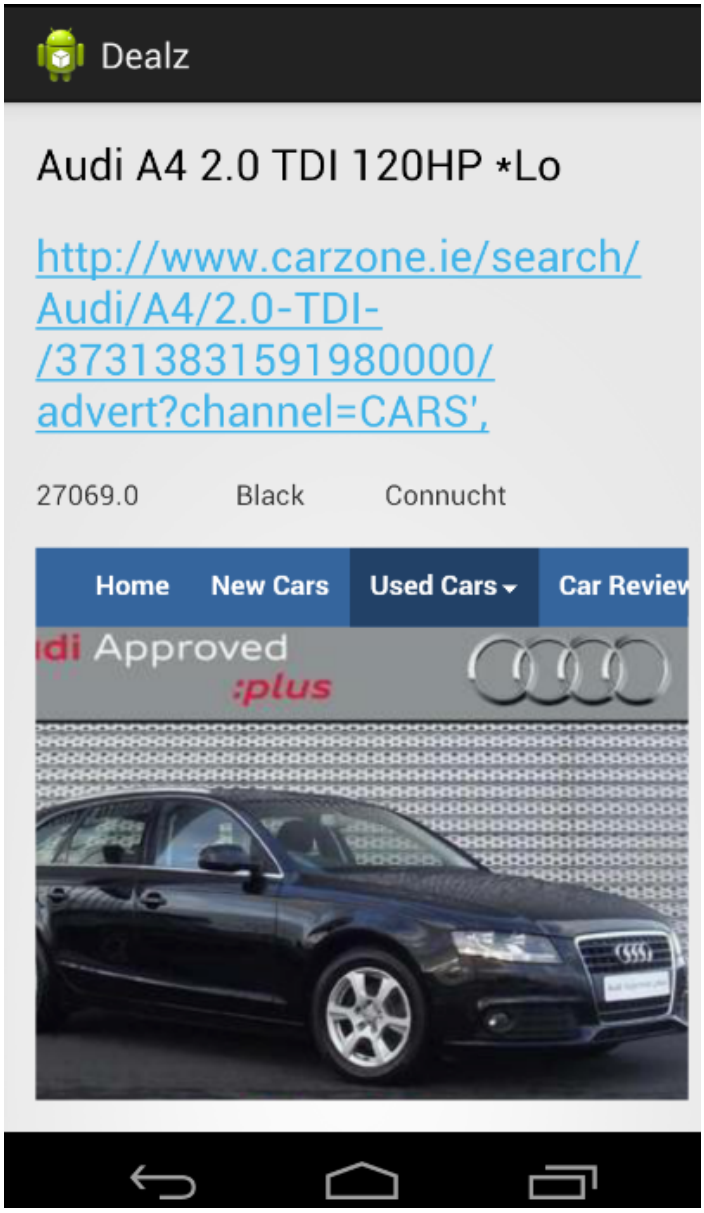
To use the search bar, simply tap the search icon and enter the value or feature you wish to filter by.

The list of cars will filter based on valid search information and when you press the backspace, the original list will re-populate.



Single Car

You will now be taken to a display containing a single car.

Each single car display contains various pieces of information about that car, a link to the original add and a web view pane for viewing the add.


Use the web view to view the add listing and if you decide you would like to open the advert within a browser, simply selected the "Dealz!" text to be taken there automatically.
